Education

Polytechnic University of the Philippines

Bachelor of Science in Computer Engineering

Relevant coursework: Programming Logic and Design, Object-Oriented

Programming, Computer Hardware Fundamentals, Data Structures and Algorithms,

Advanced Engineering Mathematics, Operating Systems.

Sta. Mesa, Manila

September 2024 - Present

FEU Roosevelt - Rodriguez

Science, Technology, Engineering, and Mathematics | With High Honor

Rodriguez, Rizal

July 2024

Experience

Researcher

i.Probe Research and Marketing Solutions Corp.

Pasig City, Philippines

November 2025

- Coordinated the preparation of survey materials and managed fieldwork logistics to ensure smooth operations
- Led field teams and acted as an enumerator for multiple citywide operations, conducting extensive door-to-door surveys
- Assisted in verifying survey outcomes and checking data accuracy to ensure reliable research results

Social Media Coordinator

Ramcar Philippines

December 2022 -

December 2023

- Identifying and communicating with relevant social media creators to establish brand partnerships
- Managed relationships with social media creators for high-profile promotional campaigns, including the launch of new Tokyo Tokyo products.
- Collaborated with brand partners to ensure accurate highlighting of key product features for Unilab and Tokyo Tokyo, effectively driving consumer interest and sales.
- Utilizing social media trends and distribution tactics to boost likes, shares, and overall interaction with brand content

Projects

Data Structure Algorithm Simulator | Project Leader

- A Python GUI application that simulates and visualizes core data structures (including Stacks, Queues, Binary Trees, and Binary Search Trees) and algorithms (such as sorting and recursion) to help users understand step-by-step data processing
- Role: Project Leader in a collaborative 4-member team. Specifically developed the simulation for Queues and contributed to the system's visualization and graphical user interface.
- Technologies Used: Python & Pygame
- Outcome: Successfully delivered an interactive educational tool that translates complex algorithms and data structures into easy-to-understand visual representations

Snake Game

- A classic arcade-style game featuring a graphical interface, smooth responsive movement, increasing difficulty, and collision detection where the player controls a growing snake
- Technologies Used: Python, Tkinter
- Outcome: Successfully refactored procedural code to practically demonstrate the four fundamental principles of Object-Oriented Programming (Encapsulation, Abstraction, Inheritance, and Polymorphism)

Quiz Creator

- A terminal-based interactive program featuring a dual-mode system where users can choose to either dynamically generate custom questions or play the game using the newly gathered questions
- Technologies Used: Python
- Outcome: Built a seamless pipeline for user-generated content, efficiently handling question creation, user answers, and game feedback

Expense Tracker

- A simple, terminal-based personal finance program designed to log, categorize, and analyze financial activities to make budgeting easier and more effective
- Technologies Used: Python and CSV (for expense data storage)
- Outcome: Created a practical and efficient tracker that empowers users to seamlessly add, remove, and view detailed expenses, including specific dates, amounts, and descriptions

Affiliations & Activities

Google Developer Group on Campus PUP | Data and Machine Learning Cadet

- Actively engaged in the organization's initiatives, developing foundational skills in data science and machine learning.
- Consistently participated in both online and on-site study jams and workshops to enhance technical proficiency and collaborate with peers

PUP - Sta. Mesa. Manila
November 2025 - Present

AWS Cloud Club PUP | Student Member

- Actively engaged as a student member, participating in organizational activities and broadening my foundational knowledge of Amazon Web Services and cloud computing.

PUP - Sta. Mesa. Manila
October 2025 - Present

ICPEP Student Edition - PUP Manila | Student Member

- Actively involved in the organization's activities, supporting its initiatives and engaging with the computer engineering student community.

PUP - Sta. Mesa. Manila
November 2024 - Present

Mathrix Club | Social Media Moderator

- Managed the club's official Facebook page, maintaining an active and engaging online presence for the student body.
- Designed and produced digital publication materials (pubmats) for organization announcements and campaigns.
- Monitored incoming communications and provided timely, professional responses to student inquiries.
- Assisted in the planning, coordination, and logistical execution of on-campus school events.

FEU Roosevelt Rodriguez
2022 - 2024

Skills

Languages: Filipino, English

Technical Skills: Python, R, Git, GitHub, Microsoft Office Suite (Excel, Word, PowerPoint), Google Workspace, AutoCAD, Breadboarding.

Personal Skills: Problem-Solving, Decision Making, Adaptability, Organization, Collaboration, Communication, Time Management, Attention to Detail, and Continuous Learning.
